

CertiWoodTM
Technical Centre

Service and Value

Low Cost, Experienced and Canadian-based

CertiWood™ provides engineered wood products manufacturers the competitive edge that sets their products apart and facilitates market penetration.

CertiWood™ services are demonstrably the key to success in bringing wood products to market in a timely and cost effective manner.

Recently CertiWood™ has:

- Gained approval for Plywood member companies to mark panels with the CE mark. Cost savings to individual manufacturers were substantial per operating plant.
- Secured Japanese regulatory approval for structural glue-laminated timber.
- Obtained US regulatory approval for a proprietary composite structural wood column.

International Product Certification

EU

Japan

Canada

"Partner with CertiWood and we will save you time and money on your wood product testing and certification needs."

J.F. (Jim) Shaw
CertiWood President

One Stop, Fast, Personalized Service:

CertiWood™ has one of the highest customer satisfaction rates among member companies in the entire forest industry.

CertiWood™ is well positioned in product codes and standards committees and can provide you with the insight and expertise to get your product to market.

Recent Achievements:

- Attained new JAS product qualification for a LVL manufacturer
- Obtained new CCMC approval for engineered wood post
- Facilitated new CSA O121 plywood standard
- Commenced accreditation process for calibration services
- Responded to over 400 technical enquiries over the past year

CertiWood™ is Canada's Most Experienced Engineered Wood Products Testing and Certification Agency.

A wide range of services are now available to EWP manufacturers:

- Product certification
- Product development testing
- Quality inspections and auditing
- Calibration
- Technical support for members and customers
- Quality system development

What our Customers are Saying:

"CertiWood provided the know-how to successfully troubleshoot through the product development stage and deliver the testing we needed to get our I-joists certified.

I was pleased with the friendly service and problem solving skills of the CertiWood team. They ensured all testing was done by the book to meet all industry and regulatory standards."

"The dedicated technical centre staff did a great job of both testing our proprietary post products and helping us get U.S. acceptance."

"Testing conducted at the CertiWood Technical Centre was a key factor in bringing our laminated beam products to market in a timely and profitable manner."
